Summary

Bachelor of Technology in Information Technology with hands-on experience in full-stack and mobile application development. Proficient in JavaScript, Python, React, Node.js, Express.js, SQL/NoSQL databases, and modern web technologies. Seeking a Full Stack Developer role to leverage skills in building scalable, secure, and high-performance applications, while contributing innovative solutions that enhance user experience and drive business growth.

Technical Skills

- Programming Languages:** Python, JavaScript, PHP
- Frontend Development:** HTML, CSS, Bootstrap, Tailwind CSS, React
- Backend Development:** Node.js, Express.js, REST API, API Design
- Databases:** SQL, MySQL, PostgreSQL, MongoDB, Database Design
- Version Control & Tools:** GitHub, VS Code, Postman, XAMPP, Vercel
- Mobile Application Development:** React Native
- Architecture & System Design:** Scalable Architecture, Microservices Architecture
- UI/UX Design:** Figma
- Version Control:** GitHub Actions, GitLab CI
- Artificial Intelligence & Generative AI Tools:** Claude, ChatGPT, Lovable (GenAI), Windsurf (GenAI)
- Search Engine Optimization
- Blockchain Technology

Experience

NextHub Technologies Pvt. Ltd.

September 2025 – December 2025

Full Stack Web App Developer Intern

- Developed responsive web and mobile applications for a government healthcare system, implementing secure authentication and cloud database integration, improving user experience and system reliability.
- Implemented REST APIs, admin dashboards, and feature enhancements using React, Next.js, React Native, TypeScript, Supabase, and PostgreSQL, delivering scalable solutions on schedule.
- Resolved performance and security challenges by optimizing code, improving load times by 30%, and ensuring secure data handling across applications.
- Collaborated with cross-functional teams of 5+ members to gather requirements, conduct testing, and deploy production-ready solutions, contributing to successful project delivery and team recognition.
- Enhanced application stability and maintainability by implementing structured logging, input validation, and error-handling mechanisms, reducing production issues and improving overall system performance.

Projects

AI-Powered Inventory Management System with E-Commerce Platform

August 2025 – September 2025

- Engineered a scalable AI-driven inventory and e-commerce platform enabling real-time stock tracking, demand forecasting, and automated restocking, improving operational efficiency by 35%.
- Architected secure role-based access and protected REST endpoints by implementing authentication and authorization mechanisms, reducing unauthorized access risks.
- Deployed cloud-based production environments with continuous integration workflows to ensure high availability and seamless updates, ensuring system uptime.
- Optimized system scalability and reliability through performance tuning, load testing, and database refinement, enhancing response time under concurrent user traffic by 30%.

Education

Bachelor of Technology in Information Technology

July 2022 – March 2026

DVR & Dr. HS MIC College of Technology

Percentage: 75%

Certifications & Trainings

- Attained Blockchain Development Basic Fundamentals – Rise.
- Certified in Full Stack Development – Udemy.
